

CONCEALED VERTICAL DROPBOLT

Specification Sheet

CD

- G** A very neat dropbolt for double gates which is enclosed within the box section frame of the gate. Minimum box section 30 x 30mm (1-1/4" - 1-1/4").
- G** When used on double gates, when the second gate is closed the dropbolt cannot be lifted.
- G** Strong and durable, assembled using standard M10 studding (not included)

PRODUCT DETAILS

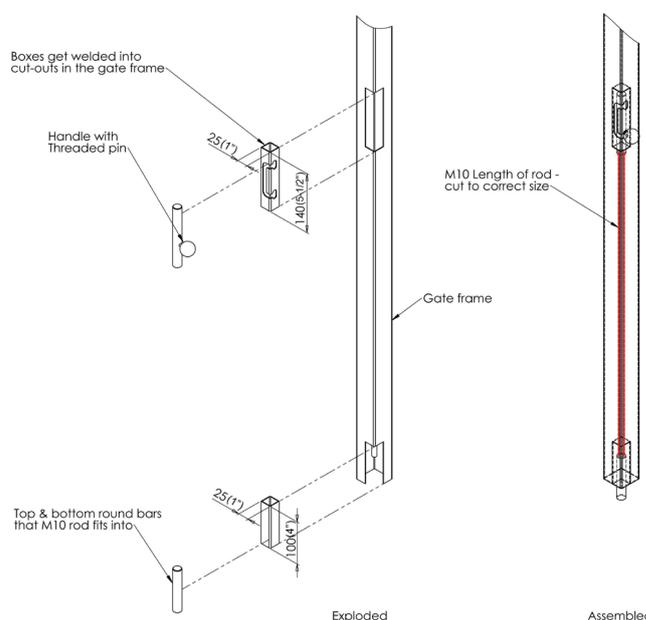

Product code:	Description:
CDD	For double gates
CDS	For single gates

Made of galvanized steel.
M10 studding not included

HOW TO OPERATE

With the dropbolt for double gates, simply close the first gate and drop the bolt into the locked position, the second gate can then be shut and locked meaning the dropbolt cannot be lifted.

For single gates the dropbolt will be used as a standard dropbolt with the neat concealed finish.

INSTALLATION

- To install, cut the corner of your gate frame to fit in the two parts of the square box section provided.
- The slotted section should be where you want the drop bolt to be operated from. The other section should be fitted at the bottom of the gate.
- Use a length of M10 studding (not included) to joint the two round sections to make the bolt as long as you need it.
